

### Technology/Automation Considerations Checklist

Consideration	Status
Smart Pumps (standard concentrations, updates, ways to notify others of updates)	
Carousels/Robotics	
Automated Dispensing Cabinets (ADCs) - restock on bar code scan (new internal NDC number on the vial vs. one on the box)	
IV Workflow Software	
Prepacking systems and compounding documentation software	
Labeling (unclear labeling that can result in error, extensive label comments that are truncated, mismatch between IV workflow system and EMR)	
Other stand-alone systems requiring drug formularies
